

The Arthur Furst Undergraduate Scholarship

Jennifer Carroll became the first recipient of the Arthur Furst Undergraduate Scholarship on October 9, 1995. She's a senior chemistry major at the University of San Francisco (USF) in California. The scholarship, endowed by Golden Neo-Life Diamite International in honor of Distinguished University Professor Emeritus and Scientific Advisory Board Senior Member Dr. Arthur Furst, is awarded annually by the USF Dean of Arts and Sciences to an undergraduate science major demonstrating outstanding academic ability and a strong desire to pursue research.

USF Department of Chemistry Chair Kim D. Summerhays, Ph.D. says:

"Beginning her senior year as a chemistry major, Jennifer's cumulative grade point average stands presently at 3.765. This includes many of the 'GPA-buster' courses such as genetics and physical chemistry."

Scholarship Winner Emulates Dr. Arthur Furst

"Jennifer is continuing her work in the research laboratory of Professor of Chemistry John Copley. Here she is investigating genetic changes in the bacterium *Fremyella diplosiphon*. And that effort, in turn, is directed toward a better understanding of what turns certain genes 'on' or 'off.' Interestingly, the work is being undertaken in a laboratory which once was a focal point for Professor Arthur Furst's own classic work in toxicology. Professor Copley speaks highly of Jennifer's work in his laboratory and particularly cites her intelligence, enthusiasm, and her persistence as key ingredients in her research success. These personal traits are, as we all recognize, essential to a research career."

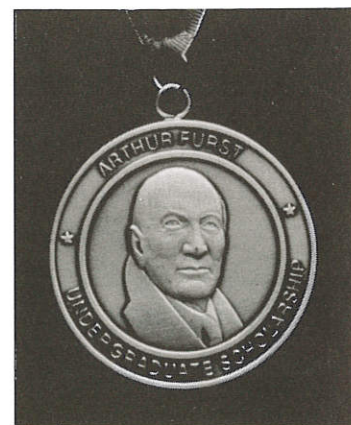

Not Just Any Undergrad

"The maturity that Jennifer brings to her course work and to the research laboratory she also brings to the teaching laboratory. Though still an undergraduate, she serves as a teaching assistant for General Chemistry. Usually we reserve these positions for our graduate students, but Jennifer is not just any undergraduate."

Supporting Exceptional Scientific Achievement

Golden Neo-Life Diamite is proud of our association with the University of San Francisco and our participation in the Arthur Furst Undergraduate Scholarship. Our goal is to recognize and support exceptional achievement in science and do so in the name of the man who has done so much for all of us, Dr. Arthur Furst. We feel that Jennifer Carroll is an excellent choice as the first recipient of this annual award.

Dr. Arthur Furst congratulates Jennifer Carroll, winner of the first annual Arthur Furst Undergraduate Scholarship.
